Re: Notice of Ex Parte Presentation – PS Docket No. 17-344

On February 8th, 2018, the undersigned representatives of Star Solutions participated in a conference call with Anita Patankar-Stoll, Jeffrey Goldthorp, and Brian Luu of the Public Safety and Homeland Security Bureau. During this meeting, Star Solutions presented the **COMPAC** product, an easy to operate, standalone, transportable cellular network that is designed for emergencies and disaster recovery. During disasters, where the normal public cellular network services are interrupted, this transportable unit can be turned on and within minutes provide temporary emergency cellular services to community leaders, first responders, and public mobile users until the public cellular network service is restored.

Not only is this **COMPAC** product useful for community leaders and first responders to communicate with each other on their own cellular phones to implement disaster recovery plans, but it also allows people-in-distress to connect, report their situation, or request for help with their personal phones.

This product would have been useful during the recent hurricane disaster in Puerto Rico in speeding up relief efforts.

This letter is submitted in accordance with Section 1.1206 (b) of the commission's rules, 47 C.F.R § 1.1206 (b).

Respectfully submitted,

Alex Pourian, *Vice President of Sales*

Andrew Mantione, *Account Representative*
